Maintenance Trays

Installation and Specification Guide

PRODUCT DETAILS

Make maintenance a breeze and keep leaves and debris out of your tank inlet with this mosquito-proof maintenance tray.

The handle allows you to remove the mesh screen with one hand - no tools required. Then simply backwash or brush off the leaves to keep your tank inlet clean.

Code	Size	Country
TMTG01	300mm	GLOBAL
TMTG02	400mm	

Installation

WHAT'S IN THE BOX?

- Maintenance Tray
-

MAINTENANCE TRAYS

1 - Clean your tank inlet screen to remove any leaves or debris. If necessary, remove your tank inlet screen to clean it thoroughly, then reinstall it.

2 - Place your Maintenance Tray on top of your tank inlet screen.

Product Specifications

		15.3"	17.5"	13.9"	1.5"	2.6"	16"

All dimensions are in mm unless otherwise stated.

Maintenance

You should regularly clean your Maintenance Tray to ensure the water flowing into your rainwater tank isn't obstructed or contaminated by leaves and debris.

To clean, grab the handle, remove your Maintenance Tray from your tank screen and brush away larger leaves and debris. If necessary, you can hose it off remove any finer debris. Replace on top of your tank inlet screen. To improve your rainwater quality, we recommend inspecting your Maintenance Tray every 3 months or between rainfall events.

Alternatively, you may wish to consider installing a Maelstrom Filter rather than using a Tank Screen and Maintenance Tray.

A common misconception about collecting rainwater is that all you need is a roof, a tank and some rain. This 'tanking' approach cannot always be relied on to deliver the volume – or quality – of water that you require. That is where we can help.

With some thought, your rain harvesting system can provide you with cleaner water and lots of it. Whether you're completely reliant on tank water or wanting to keep the garden green, our simple steps will help you achieve your goal.

The Rain Harvesting approach to rainwater collection involves using tested and proven products to make quality rainwater available for use in and around your property. You don't need much to get started and you will be surprised how easy it is to get the most out of your rainwater system.
