- 10-degree Large Span Shed in COLORBOND® Monument®
- Stratco CGI Corrugated 16mm roofing
- Walls clad in popular Stratco Superdek®

## Sheds That Are Built To Last

Built for Australian conditions, our Rural and Industrial Sheds combine durability with smart design. Galvanised C-section beams form a solid frame, while high-tensile bolted brackets at the eaves and ridge lock everything together for a tough, seamless structure.

The roofing is finished with COLORBOND® steel for long-lasting protection, and every shed comes complete with gutters and downpipes as standard. For the walls, you can choose the bold look of COLORBOND® steel Superdek® sheeting with its 28mm ribs, or keep it classic with 16mm corrugated sheeting.

The result is a shed that looks great, stands up to the elements, and gives you confidence it will perform year after year.

# Rural Sheds Barns & Stables

Your barn or shed is more than a shelter, it's a backbone for your productivity. Stratco designs and engineers a shed that considers your land, wind loads and usage, delivering durable structures built to last. Equine and livestock fit outs are designed for comfort and safety, to support animal welfare and performance. Built with premium Australian steel, the result is a low-maintenance asset that improves efficiency and holds value.

# Farm & Machinery Sheds

## Smart, Strong, Site Specific Sheds

Stratco Farm Sheds are built for the land you work. Every shed is site-specific, engineered to your wind region, terrain, and climate to meet Australian Standards. Choose from a range of wide clear spans and generous heights to suit your machinery and storage needs. With Australian-made, COLORBOND® steel cladding, and heavy-duty frames, your shed is strong, durable, and low maintenance. Add roller or sliding doors, open bays, skylights, or ventilation and create a functional space that works as hard as you do.

# Industrial Sheds

Industrial performance starts with a strong structure to suit your business needs, engineered for efficiency, durability, and long-term performance. Whether you're storing equipment, expanding your production capacity, or creating a dedicated workspace, Stratco will tailor every detail to ensure maximum functionality. Our sheds are constructed to meet Australian standards and are built to withstand the harshest environments. We use high quality, materials, ensuring your investment stands the test of time with minimal maintenance. When you choose Stratco, you're choosing a partner committed to delivering exceptional value, quality, and reliability.

- Skylights
- Spinning Ventilators
- Wall Ventilation Louvres
- Louvre or Sliding Windows
- Roof and Wall Insulation
- Fire Rated Walls
- BAL Rating Solutions Available
- Safety Mesh

# Studios & Liveable Sheds

## **Designed for Living. Built to Last.**

At Stratco, we believe a shed can be so much more than storage, it can be a home, a retreat, or a clever secondary dwelling. Our liveable sheds are fully customisable, designed and engineered to meet strict Australian standards, giving you peace of mind. Choose your size, roof style, cladding, and COLORBOND® steel colours, and we'll engineer your shed so it's ready for you to add the finishing touches, from windows and verandahs to skylights and doors, making it truly feel like home.

Whether you're creating a modern home, a weekend retreat, or a secondary dwelling, Stratco makes it simple to transform four walls and a roof into a space you'll truly love living in.

# Bring Your Design To Life With Stratco ARchitect™

Stratco ARchitect™ uses Augmented Reality (AR) to turn your shed into an immersive, real-world 3D preview from your smartphone or tablet.

Stratco ARchitect™ eliminates the guesswork previewing your design insitu.

## What do you need?

All you need is your quote, your design and a smart device to get you started, or you are welcome to try some of our favourite designs to see how Stratco ARchitect™ will work for you.

**Instant access:** Simply scan a QR code from your quote to launch Stratco ARchitect™, no downloads required.

**View designs in real life:** Simply project your shed design exactly where you want to build it.

Explore every angle: Walk around, under, and through your design in real time, seeing how it fits into your space from every perspective.

**Colours:** See and experience the colours. You can make changes via Stratco and try again.

**Enhanced planning tools:** Get smarter about layout decisions, park vehicles and equipment in place and see how the shed works using the Stratco ARchitect™ tool.

## Find out how Stratco ARchitect™ can bring your design to life.

# Design, Quote & Build With Stratco

From the first idea to finished shed, Stratco guides you through step by step.

## Shed Design & Quotation

Bring your ideas, a rough sketch or dimensions to our Stratco team and they will bring your dreams to life. We can check and review dimensions using satellite imagery before designing and preparing a quotation for you.

## Planning and Certifications

Stratco can arrange the relevant paperwork, specifications and engineering ready for the council, building surveyor or certification process depending on what state or territory you reside. We can assist and guide you through this process.

## Shed Installation

You can choose to DIY or Stratco can assist with installation and connect you with a recommended installer before confirming an installation date.

## Site Preparation

Site preparation for your shed is key. Some important things to consider are:

1. The site needs to be cleared and level. If the ground is uneven or sloped, ensure that the slope height difference does not exceed 150mm.
2. Understanding the soil type is important as it will affect footing sizes.
3. Footings and Concrete Slabs - you can either:
  - (a) Pour concrete first with footings pinned on-to-concrete or alternatively
  - (b) Columns can be fixed in-ground with the concrete slab poured later.

## Shed Delivery

We will manufacture your shed in one of our local manufacturing sites in your state or territory and then deliver the shed to site ready for installation.

# Shed Warranty

Stratco is proud to support its Sheds and Garages range with a comprehensive **25 Year Structural, 10 Year Paint Finish** and **10 Year Life Prior To Perforation Warranty**. Our warranty gives you piece of mind that when purchasing a Stratco Shed and Garage you are buying a quality product supported by one of the largest steel manufacturing companies in Australia.

## Structural Integrity

Our entire range of Stratco Sheds and Garages has been independently tested to meet all relevant Australian Building Standards and Building Code of Australia to give you the confidence that a Stratco Shed will stand the test of time.

- ✓ AS/NZS 1170.0 - Structural Design Actions - Part 0: General Principles
- ✓ AS/NZS 1170.1 - Structural Design Actions - Part 1: Permanent, imposed and other actions
- ✓ AS/NZS 1170.2 - Structural Design Actions - Part 2: Wind actions
- ✓ AS 4100 - Steel structures
- ✓ AS/NZS 4600 - Cold-formed steel structures
- ✓ AS 3600 - Concrete structures
- ✓ AS 4055 - Wind Loads for Housing
- ✓ AS 1562.1 - Design and installation of sheet roof and wall cladding
- ✓ N.A.S.H. Standard - Residential and Low-rise Steel Framing - Part 1: Design Criteria

## The Stratco Advantage

**Custom Designed • Engineered • Tested • Manufactured • Guaranteed**

- Large in-house engineering and design team to customise each project to the customer's specific needs.
- World class testing facility with a battery of testing processes to ensure the highest quality materials that consistently exceed Australian standards.
- Industry leading research and development program to drive innovation in outdoor lifestyle and building products.

The COLORBOND® steel colours shown here have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colours against an actual sample of the product before purchasing as varying light conditions and limitations of the printing process, screens and devices may affect colour tones. COLORBOND®, BlueScope, the BlueScope brand mark and ® colour names are registered trade marks of BlueScope Steel Limited.™ colour names are trade marks of BlueScope Steel Limited. © 2022 BlueScope Steel Limited. ABN 16 000 011 058. All rights reserved. Accurate colour samples are available in-store from Stratco. Please see the Stratco website for store location details.

☼ **Solar Absorptance (SA)** is a measure of how much of the sun's heat that a material absorbs. Choosing a colour with a lower SA is a cooler option and may help you meet building regulations such as NCC or BASIX. These are nominal values based on new product and measured in accordance with ASTM E 903-96. Colour coatings come in different grades for different environments and not all colours are available in every grade. Your Stratco design consultant will assist you with the grade and colour availability for your area and your product. Seafront and industrial areas may require a severe environmental coating.

**How To.**

**MAINTENANCE** Regular maintenance is essential to maintain the good looks of all Stratco steel products and to ensure you receive the maximum life-span possible in your area. Washing with clean water must be frequent enough to prevent the accumulation of dust, salts, and pollutants or any other material that will reduce the life of the product. Stratco steel products that are regularly washed by rain require no additional maintenance. No material that retains water (such as dirt or paving sand) should be placed against wall flashings and wall sheeting. Care must be taken when determining the location of Stratco steel products so that they are not placed in close contact with sources of pollution or environmental factors that could affect the life of the steel. Produced from the highest quality materials, you can expect many years of service from your Stratco Shed if the recommendations in the 'Selection Use and Maintenance' and 'Severe Environment Considerations Brochure' are followed.
